

The First AI-Native Dental Operating System

Autonomous AI agents. Self-improving intelligence. Built for DSOs.

Dr. Alexander V. Antipov, OMS
Founder & CEO · Board-Certified Oral & Maxillofacial Surgeon
Galleria OMS · Fusion Dental Implants · Full Arch Center · CA Implant Clinic

\$8.29B	94.3%	5 Agents	HIPAA
TAM by 2032	Collection Rate	AI Live	Compliant

THE PROBLEM

- 34% of dental claims denied on first submission — costs \$25–\$118/claim to rework
- \$400K annual revenue leakage per DSO location from manual billing errors
- 4–6 disconnected tools per practice: PMS, billing, insurance, scheduling, comms
- Zero autonomous AI agents in Dentrix, Eaglesoft, or Curve Dental today

THE SOLUTION

- > 5 autonomous AI agents: Treatment, Eligibility, Collections, Scheduling, Fraud
- > Karpathy self-improving wiki — 144 wikilinks, compounds every night
- > Universal DatabaseAdapter: plug in any DSO (Western Dental, ClearChoice, Novia)
- > Multi-tenant DSO onboarding in 4 self-serve steps — zero IT lift required
- > 94.3% collection rate vs. 68% industry average

MARKET OPPORTUNITY

\$8.29B	16.3%	185K+	12K+
TAM 2024–2032	CAGR to 2032	US practices	DSO locations

TECHNICAL MOAT — 4 Advantages That Take 3+ Years to Replicate

Karpathy Wiki Knowledge graph: 144 wikilinks. Compounds nightly, zero human input.	Universal Adapter Any DSO database via one HIPAA-compliant adapter. No custom integrations needed.	Clinical AI Built by an OMS. CDT codes, fraud rules, and insurance logic from real surgery.	Nightly Loop Treatment → Eligibility → Collections → Scheduling → Fraud. Runs every night.
